

Quick Attach Work Platform

Quick Attach Work Platform - Versatile lift truck work platforms connect quickly and safely to the forklift through putting in tines into tine pockets and chaining platform to the forklift. These attachments are usually utilized to be able to safely and efficiently transport maintenance staff. The fork lock or tine should be engaged to be able to lock the platform to the forks correctly. This particular attachment comprises a checker floor plate platform as well as a long strap with hook in order to securely attach the platform to the fork truck. These work platforms are constructed of welded steel and powder coated using a blue finish. They have a raising capacity of one thousand pounds.
